January 2017

TTCI is hosting a 2017 NUCARS® and TOES™/STARCO™ User Group Meeting on March 23rd, 2017 following the 22nd AAR Annual Research Review in Colorado Springs, Colorado. The meeting will take place at the Cheyenne Mountain Resort from 8:00 am to 4:30 pm on March 23rd. A light breakfast and lunch will be provided.

The first half of the meeting will provide insight on new enhancements to our software and how the software has been used for specific projects. The second half of the meeting will be used for a ½ day of FREE NUCARS® modeling training on a specific topic by one of our leading experts in the field of vehicle dynamics. Sample topics currently under consideration include track modeling, turnout modeling, modeling of failed components, simulating an air suspension, or simulations of radial arm suspensions.

In addition, TPCI would like to invite you to make a presentation on a project for which you used NUCARS® or TOES™/STARCO™.

You can register for the meeting at <http://www.nucars.aar.com/signup.php>. A full meeting agenda will be published on our websites (www.aar.com/nucars and www.aar.com/toes) by the end of February.

If you have any questions regarding the meeting, would like to request a specific topic for the free ½ day training, or would like to make a presentation at the meeting, please feel free to contact me via email: maryclara_jones@aar.com or phone 719.585.1808.

Sincerely,

MaryClara Jones
